

Hamza Mohd Zubair

Data Scientist & AI Engineer

hamzamohdzubair@gmail.com · +91 76009 53379 · hzubair.com
in/hamzamohdzubair · hamzamohdzubair

Data scientist with **9+ years** of deploying ML in production across **consumer healthcare**, **retail**, **BFSI** and **QSR**. Productized demand forecasting, supervised learning, reinforcement learning, deep learning, NLP, computer vision, Markov models and **LLM** pipelines.

EXPERIENCE

Senior Data Scientist · EPAM Systems — Jan 2026 – Present

Client: **Opella** (Sanofi Consumer Healthcare). Weekly e-commerce sell-out forecasting for Amazon and other retailers in 8+ markets.

- **Product discontinuation lifecycle** in the production forecaster: phased-out products fade to zero, are capped by retailer stock and hand volume over to their successor.
- **Model vs. covariate study** over 27 rolling backtest origins: showed model choice is worth 6–9 WAPE points while external data adds under 1, and ensembling gains about 2.
- **Plackett-Burman factorial screen** of feature groups in 16 parallel SageMaker runs, replacing one-feature-at-a-time testing; cut screening time by **63%** (246 → 91 min) and SHAP cost by about 60%.

Senior Data Scientist · Turing.com — Aug 2024 – Apr 2025

- **Complex chart production tool** (sole designer and developer): LLM agent pipelines that cut chart generation time by **93%**, from 45 min to 3 min, at about ₹0.4 per chart.

Senior Lead Data Scientist · Cartesian Consulting — Aug 2018 – Aug 2024

Promoted 3 times: Senior Analyst – AI → Senior Data Scientist (2019) → Lead (2020) → Senior Lead (2022).

- **Campaign prioritizer** (solo): contextual multi-armed bandits with Thompson sampling and UCB, deployed for 2 major clients (pharma retail, brokerage) to send each customer the right campaign, lifting click-through and revenue.
- **Automated MLOps platform** (team of 2): configure, deploy and maintain XGBoost / LightGBM models with automated feature engineering, tuning, calibration and retraining. Used by nearly all Solus clients.
- **Open rate predictor** (led a team of 3): NLP pipeline that predicts email open rates from subject lines, plus a semantically controlled LSTM that writes subject lines. Deployed for a major Indian bank.

Founding Employee & AI Lead · Untrodden Labs — Jan 2017 – Aug 2018

EDUCATION

MS, Computer Science (ML/AI) · Woolf University — 2024 – 2026
Certification, Reinforcement Learning · IISc Bangalore — 2019 – 2020
MSc, Cognitive Science · IIT Gandhinagar — 2013 – 2015
BTech, Bioinformatics · VIT Vellore — 2009 – 2013

SKILLS

Languages	Python, Rust, Kotlin, SQL, R
ML	PyTorch, TensorFlow, Keras, scikit-learn, XGBoost, LightGBM, SHAP, Vowpal Wabbit
Forecasting	Chronos-2, Prophet, MFLES, rolling backtests, factorial experiments
Data & MLOps	pandas, NumPy, SciPy, Snowflake, AWS SageMaker, MLflow, FastAPI, GitHub Actions
LLM	LangChain, DSPy, RAG pipelines

AWARDS

Employee of the Quarter · Cartesian Consulting — Q1 2020
Innovation Award, for work in NLP · Cartesian Consulting — 2020
